

### TRUCE Software

TRUCE Software is the leader in Contextual Mobile Device Management solutions to eliminate device distraction in the workplace. We proudly protect over 100,000 subscribers and nearly 400 companies large and small. Our patented platform is unmatched at solving the challenge across any iOS or Android devices.

# Eliminate the Risk of Mobile Device Distractions on the Road and at Work

## Take the Guesswork out of Enforcing Your Policies

TRUCE™ is like a fine-tuned safety switch for mobile phones. You decide what mobile apps or functions should be available in work zones that are higher-risk or require more focus.

TRUCE intelligently identifies work environments based on contextual indicators such as movement, proximity or time of day. Once the context is identified, mobile apps and functionality are automatically enabled or suspended based on your policies for as long as an employee is in that work environment.

To put it simply, certain apps or functions work when they should and don't when they shouldn't.

## How TRUCE Works

The TRUCE platform consists of a Mobile App easily deployed to any mobile device, Android or iOS, company-issued or BYOD. The Mobile App enforces your mobile device usage policies at the device level. That means TRUCE always works, even if the internet goes down, WiFi is disabled, the device is in airplane mode or is connected to a hotspot.

The TRUCE Management Console allows managers to configure and enforce their company's mobile device usage policies, customizing down to the user or work-group.

Contextual information is enhanced with the addition of a Bluetooth beacon placed in a vehicle, attached to heavy equipment or installed in a physical location.

# Key Features of the TRUCE Platform

## TRUCE Mobile App

- Enables access to only approved apps or functions when active
- Automatically adjusts policy enforcement based on movement, proximity or location
- Returns to normal phone operation when not in a managed or protected zone
- Supports hands-free calling if compliant with your policies
- Can differentiate drivers from passengers when in a vehicle
- Easily deployed on any device, iOS and Android operating systems
- Built-in dashboard analytics

## TRUCE Management Console

- Enables configuration of mobile device usage policies specific to your business across all work environments
- Configurable based on company hierarchy (divisions, regions, groups, job type, individuals)
- Enforcement visibility and monitoring for all applications and functions (e.g. alerts, calls, texts)
- Dashboard analytics provide insights on blocked activities (calling, texting, app usage), managed session duration and employee work zone transitions
- Makes it easy to modify policies, understand employee behavior, and get a fuller picture of what happens across the workplace
